

WOU Etic Proposal 2009-2011

The computer science division of WOU unanimously supports the following projects:

- To focus on the 2X goal for computer science undergraduates,
- To expand the current level of support for SuperQuest
- Creation of a combined networking, forensics and gaming lab,
- To develop uniform curriculum for the current computer science transfer sequence,
- To create curriculum which would be distributed to high schools to promote computer science,
- To create and offer a certificate in Medical Informatics
- To create a professional certification center.
